

Henry Chen

949-537-9978 | veekocareer@gmail.com | Irvine, CA

PROFESSIONAL SUMMARY

Detail-oriented Investment Analyst equipped with a Double Major in Mathematics and Data Science from UC Berkeley and completion of the CFA Level I curriculum. While early in my financial career, I bring hands-on project experience in constructing optimized asset portfolios, DCF valuation, and backtesting trading strategies. Proficient in leveraging Excel, Python, and SQL to automate data processing and support data-related investment research. No sponsorship required.

EDUCATION

University of California, Berkeley

Bachelor of Arts/Science, in Mathematics/Data Science

Berkeley, CA

Graduated: 06/2022

- 3-Year Scholarship Recipient.
- Completed advanced coursework in Time-Series Theory, Linear Algebra, and Statistical Modeling.

TECHNICAL SKILLS

Finance: Portfolio Management, Asset Valuation, Financial Statement Analysis, Discounted Cash Flow (DCF), Forecasting & Budgeting

Programming: Excel, Python, SQL, Data Visualization and OpenClaw(self-learn)

Quantitative: Regression Analysis, A/B Testing

EXPERIENCE

Westudy Education Inc

Math Teacher

Irvine, CA

03/2023 – Present

- Developed an automated tracking tool using Python to streamline performance metrics and grading, significantly reducing manual data entry time.
- Communicated efficiently with parents and students, demonstrating exceptional communication and presentation skills.
- Managed and analyzed multi-group performance metrics across 50+ clients annually to meet targeted goals for students.

Climax Foods

Data & Analytics Intern

San Francisco, CA

05/2021 – 08/2021

- Performed Exploratory Data Analysis (EDA) on large-scale datasets to uncover market trends and predictive patterns.
- Collaborated with the research team to design and backtest trading strategies using rolling window analysis.
- Synthesized into actionable insights through data visualization tools, presenting results to clients to support data-driven decision-making.

CAPSTONE PROJECTS

Stock Portfolio Optimization & Analysis | CFA Project

- Performed comprehensive portfolio analysis, visualization, and optimization across diverse asset classes including equities, fixed income, gold, and real estate.
- Constructed and evaluated multiple asset allocation models to diversify investments, effectively manage downside risk, and maximize risk-adjusted returns.

COVID-19 Case Prediction and Analysis | UC Berkeley

- Utilized regression and time-series forecasting techniques to predict case trends from large-scale health datasets.
